WORK EXPERIENCE

ICEO TECHNOLOGY/ Jan 2022 - Apr 2023

Fuda website - Frontend Developer

- Collaborated with the technical leader to maintain and develop Fuda website using Javascript and VueJS. Create services for advisors and improve advisors' profiles.

  https://gitlab.com/nghianm2803/tarot-frontend

Fuda admin - Frontend Developer

- Manage users in Fuda application
- Implemented UI features for building admin interface using Polaris library. Manage users' information including advisors, transactions and services that advisor provides using Typescript, ReactJS.

  https://gitlab.com/nghianm2803/tarot-admin

Personal project - Taskflow

- Taskflow is a web application designed to streamline task management for startup companies. Taskflow empowers team managers and members to effortlessly create, assign, and track tasks.
- Create Restful API using NodeJS, ExpressJS. Authentication with JWTs, manage database using MongoDB and send mail by third party Mailgun.
- User interface using ReactJS and Material UI.
- Demo: https://taskflow-doo.netlify.app/

  https://github.com/nghianm2803/taskflow-fe
  https://github.com/nghianm2803/taskflow-be
